TRUST THE EXPERTS

Valve products, packages, and actuation experience for over 30 years has positioned Valvestock as a market leading expert in its field. Specialised stock holding branches across the UK offer service of delivery and localised knowledge to support you in selecting the correct product for the application, providing product performance from premium manufacturers, delivered within realistic time frames.

The Valvestock philosophy of adding value to valves means you deal with technically competent partners from your first enquiry. Our consultative approach ensures the optimum product from the application is selected, whether that solution is manual valves, actuated packages or full project offering. Our state of the art design facility enables us to provide customer specific designs supported by comprehensive CAD drawings. Solutions can be tailored to meet stringent site requirements covering all aspects of tagging, documentation and certification to deliver a premium level of service. After sales service ensures that all aspects of technical support, spares, servicing and retro-fit complimentary product is offered.

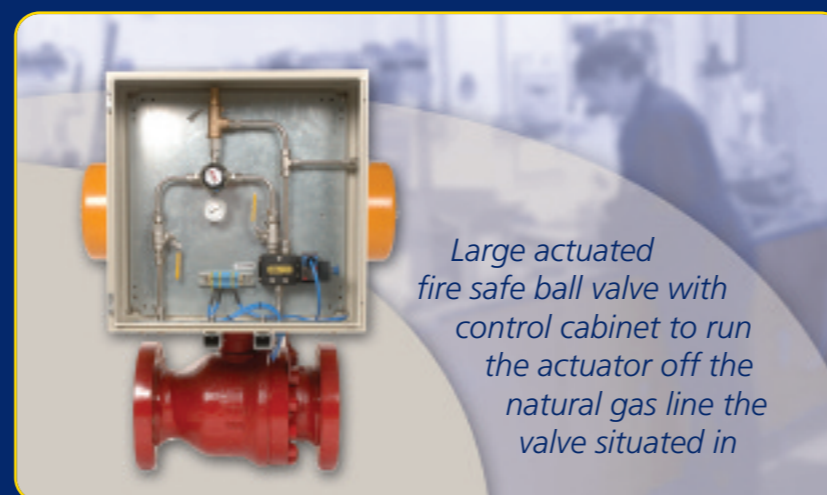

Trust Valvestock for all your industrial valve requirements.

THE BENEFITS TO YOU

- Tailored solutions delivering the optimum product for your application
- Outstanding quality delivered on time and on budget
- Vast stocks held on-site across the UK – no delay in completing your project
- Security of service and solution through ISO 9001:2000 quality accreditation
- Established premium manufacturers products – proven quality and longevity of service
- Exceptional backup provided by nationwide coverage of technical valve experts and local branches
- Project management delivering clearly tagged valves, documentation and certification ensuring ease of management of products on site

VALVE PRODUCTS AND VALVE ADDED SERVICES

- Premium manufacturer partners – Flowserve (Worcester and Norbo), Crane Saunders, Crane Flowseal, Kitz, Auma, Kinetrol, Rotork, SMC, AVK.
- Manual isolation valves - Gate, globe, check, butterfly, ball, diaphragm.
- Pressure reducing valves and safety relief equipment.
- Commissioning valves, regulating valves & flow measuring devices, RPZ valves, strainers.
- Actuated quarter and multi-turn valve solutions.
- Control valves and control systems.
- Ancillary equipment, steam equipment.
- Body materials – Cast iron, brass/bronze, SG iron, steel, stainless steel, aluminium, plastics, high performance and exotic materials.
- Pressure class & flanges/end connections – from PN6 to PN600, ANSI 125 to ANSI 6000, BS, DIN, ASA, JIS, BSP, NPT, socket weld and butt weld.
- Valve sizes – 1/8" to 24" +, 6mm to 600mm+ from stock.
- Pneumatic Actuators – Pneumatic single and double acting. ¼ turn and linear stroking.
- Electric actuators – 12/24v, 110-240v, 400v 3-phase, quarter turn, multi turn and linear stroking.
- Hydraulic actuators.
- Fail safe solutions – spring return, battery back-up.
- Bespoke package solutions – switchboxes, solenoid valves, lockup valves, filters, HART protocols, Bus systems, instrument panels and controls.
- Demanding environmental solutions – ATEX, EExd...SIL compliant.
- On-site support in valve surveys, valve sizing and selection.

Trust the experts to deliver...
